

Safety Policy

The health and safety of our employees and clients are of paramount importance in the conduct of our business.

Risks inherent in all operations must be managed to prevent occupational injury or illness.

All levels of management positions and supervisors are responsible and are held accountable for providing a safe work environment with proper equipment, procedures, training and programs.

All employees must accept their responsibility to comply with health and safety legislation, government regulations, established rules and procedures according to this safety program. Employees are expected to work in a manner that safeguards themselves, co-workers, and clients.

We expect dedication in health and safety performance, to be achieved through the support and active participation of all employees.

No work is so important that we cannot take the time to do it safely. Safety must not be compromised.
